

Region 5 700 MHz Regional Planning Committee

January 29, 2008

RE: Modification to Region 5, 700 MHz Plan, Docket Number 02-378

Marlene H. Dortch
Federal Communications Commission
Office of the Secretary
445 12th Street, SW
Washington D.C. 20554

Dear Secretary Dortch:

This plan amendment is filed to comply with the requirements of PS Docket 06-229. The Frequency allocation table is amended to reflect the new band plan in that Docket. In addition the plan is amended to reflect election of a new vice-chair, Don Root. Included in the plan is a letter from the State of California, giving up their general category allocations. The letter was received after the Regional Committee meeting on January 16, 2008 and after adjacent region concurrence was received. Therefore, the allocation spreadsheet still lists the State allocations. Region 5 intends to make other plan revisions at a later date and will at that time amend the allocation spreadsheet.

The meeting minutes are in the amended plan and the meeting was held on January 16, 2008 in Riverside California to vote on all amendments. Adjacent Region concurrence emails are in the amended plan.

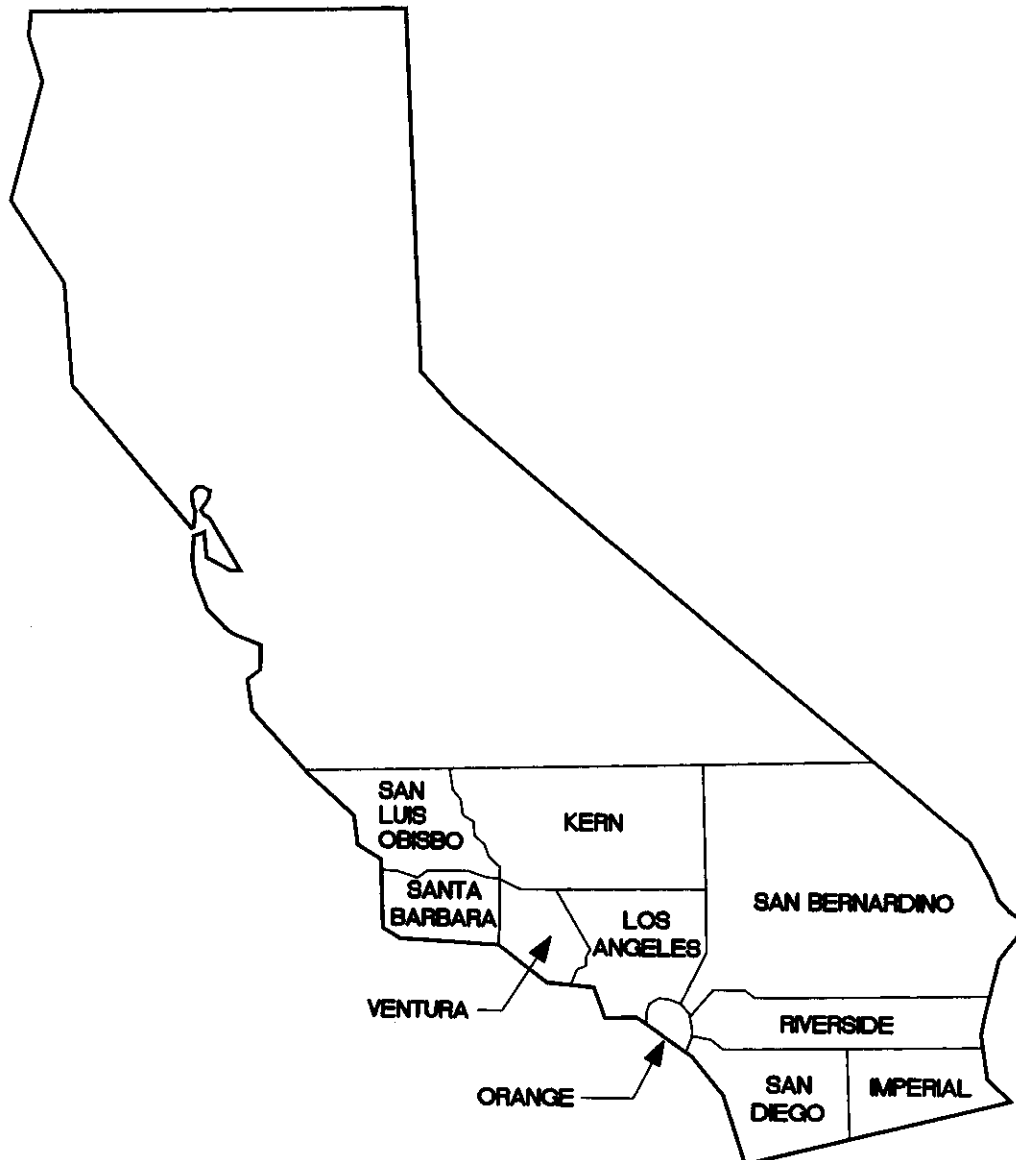

I certify that all meetings including workgroup meetings were open to the public. Notice of the meeting was given per the requirements of the Region 5 plan.

Sincerely,

A handwritten signature in black ink, appearing to read "David Buchanan", with a long horizontal flourish extending to the right.

David Buchanan, Chair
Region 5 700 MHz Regional Planning Committee

SOUTHERN CALIFORNIA 700 MHZ REGIONAL COMMUNICATIONS PLAN REGION #5

DAVE BUCHANAN
CHAIRMAN

Appendix D Tribal Information

Appendix E CPRA Member List

Appendix F Inter-Regional Coordination and Agreements

1. Regional Committee Positions

At the first regional plan meeting on September 2, 1999, David Buchanan was elected as Regional Chair. His contact information is below:

David Buchanan
11009 Hawkridge Rd
Yucaipa, CA 92399
Phone 909-633-9336
Email david_bu@pacbell.net

At the January 16, 2008 regional plan meeting Donald Root was elected Vice Chair of the Committee. His contact information is below:

Donald Root
County of San Diego
5555 Overland Park, Suite 5105
San Diego, CA 92123
Phone 858-694-3903

At the third regional plan meeting on April 16, 2003 Gary Poon was elected as Secretary of the Committee. His contact information is below:

Gary Poon
County of Los Angeles
1110 N. Eastern Ave.
Los Angeles, CA 90063
Phone 323-267-3004
Fax 323-262-4607
Email gpoon@co.la.ca.us

2. RPC Membership

Appendix A contains the membership list for Region 5. Membership is open to any interested party. Voting and operating procedures are described in Section 5 of this plan.

3. Region Description

Region 5 commonly referred to as Southern California, consists of 10 counties – San Louis Obispo, Santa Barbara, Kern, Ventura, San Bernardino, Los Angeles, Orange, Riverside, San Diego, and Imperial.

The Southern California terrain is varied and rugged. Elevations range from 180 feet below sea level to over 10,000 feet above. Population is concentrated in the Los Angeles basin and surrounding areas and in San Diego and it's surrounding areas. Other areas of Southern California have small concentrated areas of population with vast areas of mountains and desert with very sparse population. The Los Angeles Basin including surrounding areas

requires the majority of spectrum to support public safety services to the 15.6 million citizens.

All types of public safety agencies and services are located in this region. The majority of requests for voice spectrum were as follows.

The State of California's request for spectrum is to support a new statewide system that will integrate multiple state agencies on the system. The State is also designing the system to accommodate local agencies that wish to participate.

Several Counties in the region are requesting spectrum to expand and accommodate growth of existing 800 MHz trunked systems.

The State Emergency Medical Services Authority and American Medical Response (AMR) a large ambulance service provider requested spectrum for new emergency medical systems.

Another category of requests was from a few cities in the Los Angeles basin area to satisfy long unmet needs.

4. Notification Process

The First Regional Plan Meeting was held on September 2, 1999. Notices were sent 60 days or more prior to the meeting, by mail, to FEMA Region 9, APCO, FCCA, IMSA, ASHTO and the FCC. The meeting was advertised in the APCO Magazine (August 1999) and the CPRA (California Public-Safety Radio Association, the local APCO chapter) News Letter (July 1999 edition). The FCC did not issue a Public Notice of the meeting. The California State Office of Emergency Services sent representatives to the meetings and they represent National Security and Emergency Preparedness at the state level and also coordinate with local emergency preparedness offices. The convener, David Buchanan also contacted several agencies via email that expressed interest in the planning process. The CPRA CommLink is sent monthly to nearly all public safety agencies and is considered the primary notification method.

Attached is a representative membership list for CPRA. As with any organization the membership changes somewhat over time. The membership over time still represents the greatest number of public safety agencies in Southern California that the Committee is aware of.

The second meeting was held on June 21, 2000. The FCC did issue a Public notice for this meeting. The meeting was again advertised in the CPRA CommLink. During the meeting an opportunity was given for anyone not at the first meeting to object and ask for a revote on decisions made. No one came forward to object.

The Convener (later elected Chair) discussed with representatives of some public agencies, ways to notify interested persons and agencies of this planning process. From past experience we found newspaper advertising to be impractical due to the number of newspapers operating in this large Region. Also, past experience of 800 MHz planning when some newspaper advertising was done showed no public safety representative not already aware of the advertising and process read the advertisement. It was concluded the best means to reach out as widely as

possible was to use the existing resources of CPRA. No other local or State publications are known to reach people interested in this planning effort.

Southern California public safety agencies have a long history of participating in CPRA. CPRA was formed in 1935 and became a chapter of APCO in 1945. The chapter continues to hold a frequency coordination meeting monthly as part of the monthly chapter meeting. The APCO local frequency advisors present all applications for approval by the group. While this is an informal process done in addition to the formal coordination process, it is widely known in the public safety community and promotes the open cooperative spirit of communications planning in Southern California. Because of this history, it is widely known to contact CPRA local advisors for spectrum issues. Because of this history, a list of agencies, with known spectrum problems were able to be contacted by local frequency advisor Gary Gray. From this history agencies know to either watch the CommLink or the CPRA WEB site or attend the monthly meetings to learn of the 700 MHz planning or other spectrum planning efforts.

As the primary purpose of the planning effort is to allocate spectrum to public safety agencies needing additional spectrum, the Committee made special efforts to allow agencies to come forward and demonstrate a need for additional spectrum. A filing window for requests was open from the first meeting until January 1, 2001 and published in the July through December 2000 issues of the CPRA Newsletter. This was advertised at CPRA monthly Meetings and in the CPRA CommLink. The local APCO frequency advisor Gary Gray, personally contacted several agencies he knew of that had unfilled needs that were long standing. These initial requests, using the technical assumptions in Section 7, were used to establish the initial allotment list shown in Appendix A.

The Commission in a letter dated December 30, 2002 dismissed the April 16, 2002 plan. The Commission among other things, asked for a better outreach to Indian Tribes. To address this concern the Committee held a 4th meeting on April 16th 2003. Letters were sent to all Tribes that could be identified by an Internet search. A list of Tribes and copy of the letter is attached in the Appendix D of this plan. A FCC public notice of this meeting was issued and Notice published in the February 2003 issue of the CPRA Newsletter and also posted at the CPRA WEB Site www.cpra.org.

All meeting notices, minutes and members of the committees are shown in the appendixes of this plan. The meetings were open to any who wanted to attend.

5. Regional Plan Administration

5.1. Operations of the Regional Plan Committee

This committee will use Robert's Rules of Order to conduct meetings. All decisions will be by clear consensus vote with each Public Safety Agency² having one vote. This voting insures that all agencies regardless of size have an equal vote. This region also emphasizes the clear consensus in deciding issues. The meetings are open to all persons and a public input time is given for anyone to express a viewpoint or to have input to the planning.

Workgroups may be formed as needed to work on specific issues. For the initial planning three workgroups were formed – writing group, spectrum planning group and operations group. Workgroups are intended to work on details of specific issues and make recommendations to the full committee. Any changes to the Regional plan must be voted and approved by the full Regional Plan Committee. Workgroups are open to any who want to participate. The Chair of the Regional Plan Committee appoints the Chair for each workgroup.

A minimum of one meeting per year will be held of the full committee. The Chair may call other meetings as needed, or requested by the Committee members. These will be announced and advertised 90 days in advance by the Committee Chair. The FCC will be contacted to issue a Public Notice of the meeting; the meeting will be announced in the CPRA news letter and posted on www.cpra.org. In addition a email list server named CPRA700@yahoogroups.com will be used for notification. The list server is open for anyone to sign up who would like to participate. Normal time for the annual meeting will be in January each year.

Beginning two years after Federal Communications Commission approval of this Regional Plan, the Chair shall call a meeting of the Committee to elect a Chair, Vice Chair and Secretary to serve for two years. There is no limit to the number of terms that may be served.

If the Chair is unable to serve a complete term the Vice Chair will serve as Chair until the next election meeting. If both the Chair and Vice Chair are unable to serve their full terms one or the other should strive to call a special meeting of the Committee to elect replacements. If for some reason, neither the Chair nor the

² Agency is defined as a City, County, State EMS Authority and the State of California, each having one vote.

Vice Chair can call the special meeting; the State or any County within the region may call for a special meeting, giving at least 90 days notice, to elect replacements.

The Chair and Vice Chair duties and powers are expressed in this plan. Their powers are limited those specified in this plan or the agreements with adjacent regions contained in this plan.

The Secretary is responsible to maintain and store all records of the committee. The Secretary also prepares minutes of all Committee meetings. At any time a new secretary is elected, the records of the Committee shall be transferred to the new secretary.

5.2. Procedure for Requesting Spectrum Allotments

The procedure for initial requests is stated in Section 4. After plan approval, agencies desiring a new, additional or modified spectrum allotment shall submit a request to the Chair in writing indicating their need for spectrum. The requests will be considered, providing that harmful interference is not caused to existing users.

The frequency allotment list is based on an assumption that the systems will be engineered on an interference-limited basis not a noise floor-limited basis. Agencies are expected to design their systems for maximum signal levels within their coverage area and minimum levels in the coverage area of other co-channel users. Coverage area is normally the geographical boundaries of the Agency(s) served plus a three-mile area beyond.

Systems should be designed for a minimum signal strength of 40 dBμ in the system coverage area while minimizing signal power out of the coverage area. TIA/EIA TSB88-A (or latest version) will be used to determine harmful interference assuming 40 dBμ, or greater, signal in all systems coverage areas. This may require patterned antennas and extra sites compared to a design that assumes noise limited coverage.

To maximize spectrum utilization, receivers of the highest quality must be used in systems. Given a choice of radios to choose from in a given technology family, agencies should use the units with the best specifications. This plan will not protect agencies from interference if their systems utilize low quality receivers.

Agencies will need to provide the Committee with a full justification for the additional spectrum. All requests will be considered on a first come first served basis. In the event that contending requests are received, in the same time frame Section 8.5 will be used to determine priority for allocation of spectrum.

Priority is given to users fundamentally involved with the protection of life and Property

Priority is given to shared multi-agency systems. These systems can be either groups of separate departments within a large agency or groups of agencies operating together under a large blanket agency.

Immediate documented funding must be available to construct the system using these 700 MHz frequencies.

For approval, the Chair will distribute the request to all other agencies with allotments in the plan for review. An agency may protest approval within 30 calendar days. Protests will only be considered if an agency or the Chair can show harmful interference is likely based on the input submitted by the agency requesting the new allotment or the allotment does not conform to plan criteria. If the parties cannot resolve the issues and so inform the Chair within 14 calendar days then a full Committee meeting will be scheduled to consider and vote on the protest. Absent a protest, the allotment will be approved by the Chair and submitted to the FCC as a plan amendment.

5.2.1. Procedure for Plan Modifications

Modifications to this plan, other than as specified above in Section 5.2 must be approved at a meeting of the full committee. The Chair may propose changes and call a meeting to consider and vote on the change. Others with a requested amendment to this plan should submit the request to the Chair and the chair will call a meeting of the full committee to consider and vote on the change.

5.3. Procedure for Frequency Coordination

Before applicants submit an application to one of the FCC recognized frequency coordinators, the application must be reviewed at a frequency meeting of the Regional Planning Committee. The Committee will review the application to ensure it complies with all elements of the Regional Plan. This will NOT be a review to ensure the application form meets FCC requirements for filing.

The applicants must submit a copy of the FCC application and supporting documents to the

Regional Plan Chair. An interference prediction map must be included in the documentation. TIA/EIA TSB88-A (or latest version) guidelines will be used to produce the interference map. The map must show all interference predicted using TSB88-A guidelines. Any agency with co-channel or adjacent channel allotments may request field tests of signal levels to verify interference signal levels. Agencies must be prepared to conduct these field tests if a request is made. All agencies must meet the coverage criteria of Section 7.

The frequency meetings will be held as needed to review applications but normally concurrent with the California Public-Safety Radio Association (CPRA-the Southern California Chapter of APCO) monthly meeting. After the regular CPRA meeting, the 700 MHz Regional Plan Frequency meeting may be convened. The CPRA meetings are normally attended by many of the public safety agencies in Southern California. Notification of frequency meetings will be placed in the CPRA CommLink and will be available to non-members at the CPRA WEB site (www.cpra.org). The FCC certified frequency coordinators will be notified of the meetings. Membership in APCO or CPRA is not required to participate in these frequency coordination meetings and the collocation of meetings is solely for the convenience of the Regional Plan Members.

5.4. Adjacent Region Spectrum Allocation

Region 5 shares borders with Arizona, Nevada, and Northern California. Region 5 has a small population density along the Nevada and Arizona borders. Region 5 will coordinate channel allocations with all bordering regions and the State of California for those channels established by planning as statewide use.

Region 5 will provide data to the National Public Safety Telecommunications Council (NPSTC) Pre-coordination Data Base to assist with adjacent region coordination.

5.5. Mexico Border issues

Region 5 shares a border with Mexico. The Counties of Imperial and San Diego are impacted by any border spectrum agreements. State of California spectrum use is also impacted in those counties. Region 5 requests input to the FCC for any spectrum sharing agreements with Mexico. Any agreement that impacts allotments to Imperial County and San Diego County/City will impact the entire allotment list for Region 5. Region 5 is ready to help the FCC in any way in working out spectrum sharing agreements with Mexico with minimum impact to Region 5. Agencies located in the Border area with Mexico should note the following conditions. Public safety licenses are granted subject to the conditions as set forth in 47 C.F.R. § 90.533. Public safety transmitters operating within 120 km or 75 miles of the Mexican border must accept any interference that may be caused by operations of UHF television broadcast transmitters in Mexico and that conditions may be added during the term of the license if required by the terms of the international agreements between the United States and the government of Mexico, as applicable, regarding the non-broadcast use of the 764-776 MHz and 794-806 MHz bands.

5.6. Dispute Resolution

In the event an agency disputes the implementation of this plan after FCC approval, the agency must notify the Chair of the dispute in writing. This section does not apply to protests over new spectrum allotments (see Section 5.2). The Chair will attempt to resolve the dispute on an informal basis. If a party to the dispute employs the Chair, then the Vice Chair will attempt resolution. In such cases, the Chair shall be deemed to have a conflict of interest and will be precluded from voting on such matters. If after 30 days the dispute is not resolved, the Chair (or Vice Chair) will appoint an ad-hoc Dispute Resolution Committee. The committee shall be comprised of a member from the State of California and members selected from representatives of the counties in the region, the City of Los Angeles or the City of San Diego. No member selected may be from an agency involved in the dispute. That committee will select a Chair to head the committee. The Regional Plan Chair (or Vice Chair) will represent the Region in presentations to the Dispute Resolution Committee. The Committee will hear input from the disputing agency, any effected agencies and the Region Chair. The Committee will then meet in executive session to prepare a recommendation to resolve the dispute. Should this recommendation not be acceptable to the disputing agency(ies), the dispute and all written documentation will be forwarded to the Federal Communications Commission for final resolution.

6. Interoperability Channels

6.1. Introduction

The ability for agencies to effectively respond to mutual aid requests directly depends on their ability to communicate with each other. Southern California is subject to many natural disasters and mutual aid is common among agencies. This Plan seeks to facilitate the communications necessary for effective mutual aid.

The State of California will administer the interoperability channels via a State Interoperability Executive Committee (SIEC) under National Coordination Committee's (NCC) guidelines. As the State is divided into two regions this will facilitate common operating procedures for both North and South. If the State is unable to form the SIEC and develop interoperability operating procedures then this committee will do so. This Plan also gives the following guidance to the SIEC to take into account the needs of Southern California.

6.2. Tactical Channels

This Region is unable to set aside, at this time, additional channels beyond those established by the FCC in their band allocations, for interoperability use. Because of the extensive mutual aid operations that can involve several mutual aid operations simultaneously, all mobile and portable units operating under this Plan should have all the interoperability channels both repeat and direct modes programmed into each unit. The radios must be programmed with the minimum number of channels called for in NCC guidelines or as the SIEC specifies. The channels display will be in accordance with the NCC guidelines that have common alphanumeric nomenclature to avoid any misinterpretation of use.

6.3. Deployable Systems

This Plan strongly supports use of deployable systems, both conventional and trunked. Deployable systems are prepackaged systems that can deploy by ground

or air to an incident to provide additional coverage and capacity on interoperability channels. This will minimize the expense of installing extensive fixed infrastructure and recognizes the difficulty of providing complete coverage of the region due to environmental constraints.

Agencies should have conventional deployable systems capable of being tuned to any of the interoperability tactical channels. Those agencies that are part of a multi-agency trunked system and commonly provide mutual aid to each other are encouraged to have trunked deployable systems that operate on the tactical channels designated by the FCC for this use. The SIEC will develop the operational details for deploying these systems.

It is expected that the tactical channels set aside for trunked operation will be heavily used by deployable systems. Therefore, the tactical channels cannot be assigned to augment general use trunked systems.

6.4. Monitoring of Calling Channels

It is desired that the State of California take responsibility for monitoring the interoperability and calling channels. This would include assignments of channels to mutual aid incidents as required. The SIEC will develop operational guidelines for this function.

7. Interference Protection

The frequency allotment list is based on an assumption that the systems will be engineered on an interference-limited basis not a noise floor-limited basis. Agencies are expected to design their systems for maximum signal levels within their coverage area and minimum levels in the coverage area of other co-channel users. Coverage area is normally the geographical boundaries of the Agency(s) served plus a three-mile area beyond.

Systems should be designed for a minimum signal strength of 40 dBμ in the system coverage area while minimizing signal power out of the coverage area. TIA/EIA TSB88-A (or latest version) will be used to determine harmful interference assuming 40 dBμ, or greater, signal in all systems coverage areas. This may require patterned antennas and extra sites compared to a design that assumes noise limited coverage.

To maximize spectrum utilization, receivers of the highest quality must be used in systems. Given a choice of radios to choose from in a given technology family, agencies should use the units with the best specifications. This plan will not protect agencies from interference if their systems utilize low quality receivers.

8. Allocation of Narrowband “General Use” Spectrum

All agencies requesting spectrum during the initial filing window (see Section 4) were

allotted channels excepting as noted in Section 8.4. Allotments were made in 4 channel (25 kHz) groups to allow for various digital technologies to be implemented. Requests for voice channels were allocated on the basis of one 6.25 kHz channel per one voice channel requested. For narrowband mobile data requests two 6.25 kHz channels were allocated for each mobile data channel requested. This was done to maximize spectrum efficiency and to meet the FCC goal of one voice channel per 6.25 kHz of spectrum. In a few cases this resulted in allocating one or two extra 6.25 kHz channels to maintain the 25 kHz grouping of channels.

The Spectrum Workgroup requested information via a series of five questions to each agency requesting spectrum. This information validated the need for spectrum and insured no duplicated requests involving multi-agency systems. Small agencies were encouraged to join multi-agency systems if possible.

8.1. Low power Secondary Operations

To facilitate portable operation by any licensee, and to provide channels for such operation without impacting the use of primary channels, certain low power secondary use will be permitted. Any public safety entity otherwise licensed to use one or more channels under this Plan may receive authorization to license any additional channel for secondary use, subject to the following criteria:

All operation of units on such authorized channels will be considered secondary to other licensees on both co-channel and adjacent channels.

No channels on, or adjacent to, those designated in the Plan for wide area operation and/or mutual aid use will be authorized.

Channels will be authorized for use in specific areas only, such areas to be within the licensees authorized operational area.

Maximum power will be limited to 6 watts ERP.

Use aboard aircraft is prohibited.

Applications for channels may be submitted to the Committee for consideration at any time and must be accompanied by a showing of need. The Committee may select and authorize licensing of these secondary use channels after consideration of potential interference to co-channel and adjacent channel allotments, allocations and licensees. Authorization may be granted for use of any suitable channel, without prior allotment or allocation to the requesting agency.

In the event the channels authorized for low power secondary operation are needed by others during any window opening for reassignment, no protection will be afforded to the licensed secondary user, and they may be required to change frequencies or surrender licenses to prevent interference to primary use channels.

8.2. Low power Channels

The FCC in the 700 MHz band plan set aside channels 1 - 8 paired with 961 – 968 and 949 – 958 paired with 1909 – 1918 for low power use for on-scene incident response purposes using mobiles and portables subject to Commission-approved regional planning

committee regional plans. Transmitter power must not exceed 2 watts (ERP).

Channels 9 –12 paired with 969 – 972 and 959 – 960 paired with 1919 – 1920 are licensed nationwide for itinerant operation. Transmitter power must not exceed 2 watts (ERP).

These channels may operate using analog operation. To facilitate analog modulation this plan will allow aggregation of two channels for 12.5 kHz bandwidth. On scene temporary base and mobile relay stations are allowed (to the extent FCC rules allow) with an antenna height limit of 6.1 meter (20 feet) above the ground. However, users are encouraged to operate in simplex mode whenever possible. This plan does not limit use to only analog operations, these channels are intended for use in a wide variety of applications that may require digital modulation types.

In its dialog leading up to CFR §90.531 allocating the twenty-four low power 6.25 kHz frequency pairs (of which eighteen fall under RPC jurisdiction)³, the Federal Communications Commission (FCC) suggested that there is a potential for multiple low power applications, and absent a compelling showing, a sharing approach be employed rather than making exclusive assignments for each specific application because low power operations can co-exist [in relatively close proximity] on the same frequencies with minimal potential for interference due to the 2 watt power restriction.

Whereas advantages exist in not making assignments, the reverse is also true. If, for example, firefighters operate on a specific frequency or set of frequencies in one area, there is some logic in replicating that template throughout the region for firefighter equipment. If there are no assignments, such a replication is unlikely.

In seeking the middle ground with positive attributes showing up both for assignments and no assignments, we recommend the following regarding assignments associated with the eighteen narrowband channels for which the RPC's have responsibility.

Channel #'s 1-4 and 949-952 are set aside as generic channels for use by public safety agencies operating within Region 5, and the complementary channel #'s 961-964 and 1909-1912 are set aside as generic channels also for use by public safety agencies including GPS differential correction telemetry for channels 961-964 and 1909-1912 likewise operating within Region 5.

Channel #'s 5-8 are designated as Fire Protection channels for licensing and exclusive use by the Fire Protection discipline, and the complementary channel #'s 965-968 are set aside as Law Enforcement channels also for licensing and exclusive use by the Law Enforcement discipline.

Channel #'s 955-956 are set aside as Fire Protection channels for licensing and exclusive use by the Fire Protection discipline, and the complementary channel #'s 1915-1916 are set aside as Law Enforcement channels also for licensing and exclusive use by the Law Enforcement discipline.

³ See paragraphs 35 through 39 in FCC's Third Memorandum Opinion and Order for WT Docket No. 9686 adopted September 18, 2000.

Channel #'s 957-958 are set aside as Fire Protection/Law Enforcement channels for licensing and use by the Fire Protection and Law Enforcement disciplines, and the complementary channel #'s 1917-1918 are set aside as Fire Protection/Law Enforcement

Simplex operations may occur on either the base or mobile channels. Users are cautioned to coordinate on scene use among all agencies involved. Users should license multiple channels and be prepared to operate on alternate channels at any given operational area.

8.3. System Implementation

Most areas in Southern California will be precluded from immediately implementing systems due to protection requirements of existing television stations. These stations may not move until year 2006, or after, depending on the 85% market penetration of digital TV implementation.

Therefore, this plan will not require agencies to implement systems using the 700 MHz spectrum allocated to them until TV station(s) requiring protection relocate to another TV channel. After that date, agencies must release a System RFP within one year and sign a contract with a vendor within one year of releasing the System RFP. For the State of California only, implementation of general use channels shall be governed by FCC rule 90.529(b) and (c). This exception for the State is intended to keep the overall implementation of the State's 700 MHz spectrum consistent with the State licensing rules for the state only channels.

If an agency does not implement in the timeframes specified, that agency's allotment may be removed from the allotment list. An Agency may file a request with the Region Chair for an extension of time to implement. The request should include all details describing why the agency has not implemented and a new implementation schedule. The Committee Chair will advertise this request and set a date for the full committee to vote on the request. If no request for extension is received or the Committee votes not to extend implementation, the Committee Chair will advertise this action and set a filing window to give other agencies a chance to request an allotment of that spectrum.

8.4. Priority for Receiving Spectrum Allocations

All agencies, with two exceptions, received spectrum allocations as requested. AMR requested 24 voice channels and the State of California Emergency Medical Services Authority (EMSA), asked for a general EMS allocation of 10 voice channels. These requests were combined into one EMS pool allocation for EMS use, to be administered by the State EMSA. This pool is for any EMS provider to use under EMSA guidelines. The other exception was for requests by several small cities in Los Angeles County for spectrum for police operations. This exception is explained below.

The cities of Arcadia, Azusa, Glendora, Maywood, Southgate, Bell, Vernon, and Downey all requested a small number of voice channels for police operations. The City and County of Los Angeles police radio systems are on UHF spectrum (450 to 512 MHz), as is most other cities in the Los Angeles basin. These systems have established mutual aid channels and procedures in place. The County of Los Angeles Sheriff is in the early stage of planning radio system upgrades. It is likely those upgrades will allow the Sheriff to host other agencies on their system. It would be more spectrum efficient and facilitate mutual aid if the above agencies joined the Sheriff's system, thus making it a multi-agency system. Also, the Sheriff should complete its upgrade before the 700 MHz spectrum will be available for use.

in that area, thus giving relief in a shorter time frame to those cities.

For those reasons this plan does not allocate spectrum to the above listed cities, but instead urges them and the Los Angeles Sheriff to come to agreement for multi-agency use of the Sheriff's system. In the event that no agreement can be reached between any or all of the parties, those cities will be allocated spectrum under this plan. Those allotments will be taken from the allotment provided the County of Los Angeles on a one-for-one channel basis.

8.5. Priority Matrix

In the event that future spectrum requests conflict and cannot all be accommodated, the following matrix will be used to determine priority for allotment. This matrix will only be used if two requests are received in the same time frame. Otherwise, the first come first served procedure of Section 5.2 will be used.

Priority is given to users fundamentally involved with the protection of life and Property
Priority is given to shared multi-agency systems. These systems can be either groups of separate departments within a large agency or groups of agencies operating together under a large blanket agency.

Immediate documented funding must be available to construct the system using these 700 MHz frequencies.

This process, if required will be treated as a dispute and the procedures outlined in Section 5.6 using the above criteria will be used to allot the frequencies.

9. Coordination with Adjacent Regions

The adjacent Regions (Northern California, Nevada and Arizona) are not as far along in the planning process as Southern California. The Chair sent final draft copies of this plan to the conveners or Chair, as appropriate, to each adjacent region. Over half of the total General Use narrowband channels will be available to adjacent regions. Excepting the Las Vegas, Nevada, area, the border regions are sparsely populated and generally the NPSPAC 821/866 MHz band frequencies are not built out. Therefore, adjacent regions should be able to satisfy voice and narrowband data requests along their border areas with Region 5. If Nevada has problems satisfying requests in the Las Vegas area, this committee pledges to work with Nevada to resolve any issues. The adjacent regions concurred with this as shown in Appendix F.

10. Spectrum utilization

In the two high population density areas of Southern California, the Los Angeles/Orange County basin and San Diego, spectrum for public safety is chronically short to support all needs. Southern California is a leader in spectrum efficient use of public safety spectrum.

Before narrowband equipment was available, through research and testing by the County of San Bernardino, 12.5 kHz offset frequencies were used under waiver to geographically short space compared to normal co-channel spacing. This was implemented at 800 MHz and extended to 470 to 512 MHz by many other agencies under waiver of FCC rules. These efforts were the basis for spacing the NPSPAC channels every 12.5 kHz. The NPSPAC plan for Southern California also contains the strictest RF signal levels for reuse of any in the nation. Agencies are required to maintain 40 dBμ in their coverage area and have reduced signals to only 35 dBμ for adjacent 12.5 kHz channel and 20 dBμ for co-channel at the border with respective agencies. A case in point, this resulted in co-channel sharing between the County of San Bernardino and the City of Los Angeles, only 35 miles apart. Adjacent channel sharing between the County of Riverside and the County of Los Angeles, about 10 miles between borders is another example of efficient spectrum sharing. These are only two of many short spaced systems in use in Southern California.

With this plan the public safety providers are striving to utilize the spectrum as efficiently as possible. The requests for voice and narrowband data totaled 880 channels. To satisfy this need the spectrum workgroup examined the requests, along with additional information requested of all agencies, to identify any duplicate requests from multi-agency systems, or any requests that were considered unreasonable to satisfy real needs over the next 15 years.

From this, the workgroup found that some Los Angeles County Cities would be best served by joining the Los Angeles County Sheriff's UHF system. The Committee will work with all parties to accomplish this. In the event that the Sheriff cannot accommodate the agencies then their needs will be met by reducing the County of Los Angeles allotment as required.

The spectrum workgroup also recommended that allotments be made on the basis of one 6.25 kHz channel for each voice channel request and two 6.25 kHz channels for each narrowband data channel request. This recommendation is approved by the full Committee and is part of this plan. This allows for the full agency needs to be met and the committee believes also conforms to the FCC intent to require use of technology that yields one voice path for each 6.25 kHz of spectrum.

Due to the existing TV assignments and HDTV assignments, most of Southern California cannot use this spectrum until the HDTV implementation is completed. This may be sooner or later than 2006. Given this uncertainty, this plan does not limit an agency from initially implementing (if it conforms to FCC rules) a technology that yields less than one voice channel per 6.25 kHz channel or aggregating narrowband data into 25 kHz blocks. The agencies are on notice that they will not receive additional allotments due to using technology that yields less than one voice channel per 6.25 kHz of spectrum or narrowband data of less than 19.2 kbps per 12.5 kHz of spectrum.

January 14, 2008

Mr. David Buchanan, Chair
Regional Planning Committee
7445 Palm Avenue
Highland, CA 92346

Dear Mr. Buchanan:

Region 5 – 700 MHz Plan

At a Region 700 MHz Regional Planning Committee (RPC) Spectrum Workgroup meeting in 2001, the State of California requested and was allocated use of 120 "General Use" 6.25 kHz – 700 MHz channel pairs. These 120 channel pair were in addition to certain other spectrum identified as "State License" spectrum. Those 120 channels are highlighted in yellow in the attached FCC approved Region 5 Frequency List.

This letter is to inform you that the state hereby withdraws its request for the subject 120 channel pairs.

Should you have any questions concerning this matter, please contact Mr. James Kirstein, Senior Telecommunications Engineer at (916) 657-6130 or by e-mail at james.kirstein@dgs.ca.gov.

Sincerely,

GARY R. Grootveld, Chief
Office of Public Safety Communications Services

cc: James Kirstein, P.E. Senior Telecommunications Engineer, Department of
General Services, Telecommunications Division, FCC Unit

Region 5 Southern California 700 MHz Region Planning Committee

Chair: David Buchanan
Vice Chair: Garrett Mayer
Secretary: Gary Poon

Date: January 16, 2008
Time: 1:00 p.m.
Location: 1855 Chicago Av., Riverside, CA 92507

Attendees: Ref. Sign-In Sheet

1. Chairman David Buchanan called the meeting to order at 1:20 p.m. to give time to attendees for computerized sign-in. He noted that he received three letters from Southern California Public Safety agencies. In the first letter, the County of Riverside addressed the potential deployment of 700MHz systems by February 2009. In the second letter, County of Riverside explained its new radio (PSEC) system and request for additional 42 narrowband voice channels and four (4) standard 25 KHz channels for data operations. In the third letters, the Interagency Communications Interoperability System (ICIS) is requesting twelve (12) voice channels and four (4) data channels for a gateway to its existing 800 MHz ICIS systems. All these request will be on hold until after the regional plan is modified.
2. State of California is in the process of give-up 120 General Use channels in the 700 MHz voice spectrum. This allotment will be available for new assignment when an official letter from the State of California is received on releasing the spectrum.
3. There were discussions made on San Diego County and Imperial County shared use of frequencies by Mr. Don Roots of County of San Diego.
4. Mr. Ken Mann of City of Los Angeles has shifted the channel assignment without changing the approved allotment to each agency to conform to the new FCC Band Plan. Copies were available to the meeting attendees. The attendees voted and unanimously approved to ratify the amended frequency shift. The Chairman asked for editorial rights to remove channel allotment to the State of California if he received the letter from the State of California prior to filing of plan changes. He also noted that this is not the final plan due to additional changes maybe necessary pending for final resolution of boarder frequency assignment between the United States America and Mexico government.
5. As part of the meeting agenda, the RPC elected a Vice-Chair to replace Mr. Garrett Mayer who has since retired from Public Safety Services. Three

candidates were nominate by the attendees – Mr. Donald Root (of San Diego County), Mr. Mark Revis (of Riverside County), and Mr. Ken Mann (of City of Los Angeles). With majority vote and final consensus from committee members, Mr. Donald Root was elected for Vice-Chair of the Southern California 700 MHz Regional Planning Committee.

6. Mr. David Buchanan intends to serve as the Chairman until February, 2009 to ensure that the regional plan are finalized and public safety agencies in Southern California are ready for 700 MHz spectrum use. At that time, a new Chair will be elected for replacement.
7. With inputs from the floor, the Southern California Region Committee has set deadline to finalize its regional plan by October, 2008 pending for final resolution of border issues between United States of America and Mexico.
8. Discussions were made on our existing frequency packing and assignment. The Southern California spectrum were pack more tightly resulted from experience from 800 MHz NPSPAC use in comparison to automated packing by CAPRAD program. Southern California region will continue to monitor and evaluate new tools available for spectrum reuse and packing. Specifically, the committee will evaluate the New York State's engineering tool made available through Syracuse Research Institute. The committee will also review any available standards such as TSB-88.
9. The Chair noted that with the committee's approval, he will provide concurrence to the adjacent Nevada and Arizona Sates Plans (these regions have not made any changes on their plans due boarder issues) with condition of review when data is available.
10. The Chair also conducted an informal evaluation of early deployment of 700 MHz systems. Agencies included City of Riverside, Orange County, San Diego County, ICIS and San Bernardino County continues to show interest.
11. A workgroup meeting is scheduled on March 19, 2008, 1:00 to 3:00p.m. in the same location is Riverside County. Without further new business from the floor, the meeting was adjourned at 2:40p.m.

700 MHz Regional Planning Committee – Region 5
Southern California

Notice of First Meeting

The first meeting of the 700 MHz Regional Planning Committee – Region 5 (RPC) will be held as noted below:

Date	Thursday September 2, 1999
Time	1:00 PM
Location	Board of Supervisors Chambers County Government Center 385 North Arrowhead Ave. San Bernardino, CA 92415-0110

This meeting is open to all interested Public-Safety Agencies. The Federal Communications Commission in Docket FCC 98-191 requires a Regional Plan be developed before the public-safety spectrum in the new 700 MHz band can be licensed.

Agenda:

1. Introduction and overview of the regional planning process
2. Election of a Regional Chairman
3. Adoption of Operating Procedures
4. Formation of working groups.

For more information contact:

David Buchanan, Convener
County of San Bernardino
1743 Miro Way
Rialto, CA 92376
909-356-2356
dbuchanan@isd.co.san-bernardino.ca.us

Directions:

From I-10 west or east exit Waterman Ave. (just east of interchange with I215) go north to 4th street. Then turn left and continue until 4th dead ends at the Government Center.

Region 5 700MHz Public Safety Planning Committee Committee Meeting

September 2, 1999

Minutes

Meeting called to order at 13:00 hours by David Buchanan, Convenor

Overview

David Buchanan presented an overview of the 700 MHz band rules and the Regional Plan process. Glen Nash provided an overview of the National Coordination Committee process and on going work.

Election of Chairperson

Nominations were called for election of a chairperson. David Buchanan was nominated. Gary Gray made motion and second by Bryan Hawkins. No other nominations were received. The vote was unanimous for David Buchanan. David Buchanan continued to chair the meeting.

Adoption of Operating Procedures

After discussion, motion made by Chuck Luckey and second by Travis Williams to adopt the following: Operate using the latest Robert's rules of Order. The group will try to reach a consensus on all issues. If all parties cannot reach a consensus decision on an issue then a vote will be taken. Each jurisdiction has a vote and a ¾ majority is required to pass.

Formation of working groups

After discussion, the group decided on three working groups, with others later if required.

1. Drafting Group
2. Spectrum Issues Group
3. Operations Issues Group

These groups will begin work after the first of the year.

Other Business

After discussion, the group decided to open a filing window for requests for channels. This window is to run until January 1, 2000.

Meeting Adjourned

Notice of the Second Meeting Region 5 700MHz Public Safety Planning Committee

The Meeting will be held on June 21, 2000 starting at 10:00 AM in Long Beach, CA.

Address and Directions:
Long Beach City Library
101 Pacific Ave.
Long Beach, CA

From the southbound 710 FWY go to Broadway and then east on Broadway to the Civic Center. Parking is in the Public Parking Structure. The Library is southeast of the parking structure. See the included Maps.

Agenda

1. Approve minutes of 1st meeting.
2. Review NCC progress
3. Review requests for spectrum and ask for any new or missed requests.
4. Form workgroups to develop the regional plan.
5. New Business

All interested parties wishing to participate in the planning for use of new public safety spectrum in the 700 MHz band should plan to attend. For further information please contact:

David Buchanan, Chairperson
Region 5 700MHz Public Safety Planning Committee

Region 5 700MHz Public Safety Planning Committee Committee Meeting

June 21, 2000

Minutes

Meeting called to order at 10:00 hours by David Buchanan, Chairperson

Approve Minutes

The minutes of the September 21, 1999 meeting were approved, motion by Chuck Luckey and Second by Joe Parrino.

Review NCC Progress

David Buchanan presented a review of the decisions made to date by the NCC committee. Discussions and questions followed. Glen Nash who chairs the NCC Technical Subcommittee also contributed to the update.

Review Requests for Spectrum

Attendees were invited to confirm their requests were in the file maintained by the Chair to insure no requests were lost or not received. Discussion followed on the filing window. It was noted that for various reasons agency requests were received after the January 1, 2000 cutoff date. A motion was made and passed by Gary Gray and second by Mike Mockler to accept those filings and to extend the window to January 1, 2001. The Committee wants to insure all interested agencies have a chance to file.

Form Workgroups to develop the Plan

At the first meeting the group decided to create three working groups to develop the plan. They are with the chairs:

1. Drafting group – Chair Travis Williams, County of Los Angeles
2. Spectrum issues group – Chair Mehrdad Larijaniha, City of Los Angeles
3. Operations issues group – Chair Bryan Hawkins, City of Long Beach

Signup sheets were passed out for individuals to be members of the groups. The chairs will begin work on their parts of the plan. Progress will be reviewed at the next Committee meeting.

New Business

The timing of future meetings was discussed and a decision was made to hold an informal meeting in the fall to update progress and decisions of the NCC and FCC. The next formal meeting of the committee will be held after the first of the year.

Notice of the Third Meeting Of the Region 5 700 MHz Regional Planning Committee

This is an important meeting for all interested persons. The agenda includes voting on approval of the draft regional plan. If approved the plan will be submitted to the FCC for their approval.

Agenda:

1. Nominations and voting for Vice-chairperson and Secretary of the committee.
2. Vote on approval of the draft plan.

Meeting Location:

Orange County Communications
840 N. Eckhoff St. Suite 104
Orange, CA 92868-1021

Date – March 13, 2002

Time – 10:00 am To 12:00 pm

Copies of the plan are available on the internet at www.cpra.org in the resources section.
They are also available by contacting:

David Buchanan, Chairperson
Region 5 700 MHz Regional Planning Committee
County of San Bernardino Network Services
777 E. Rialto Ave.
San Bernardino, CA 92415-0740

Phone 909-387-3337

**Region 5, 700 MHz Planning Committee
Third Meeting Minutes**

Date: 13, March 2002

**Location: Orange County Communications
840 North Eckoff Street, Suite 104
Orange, CA 92868-1021**

Chairperson: David Buchanan

Chairperson, Dave Buchanan, opened meeting at approximately 10:00 am Pacific Standard Time. Attendees signed the Committee log-sheets.

Minutes from last meeting (June 21, 2002)

The meeting minutes from the last meeting were approved as written.

Position of Vice-chairperson

The first order of business was the election of the Vice-chairperson. A motion was made by Bill De Camp, State of California and was seconded by Joe Parrino, City of Montebello nominating Garrett Mayer, County of Los Angeles, to the position of Vice-chairperson. A vote taken of all participating members of the committee confirmed the election of Garrett Mayer as the Vice-chairman. Congratulations to Garrett.

Position of Secretary

The second order of business was the election of the Committee's Secretary; A motion was made by Travis Williams, County of Los Angeles to elect Chuck Luckey, City of Long Beach, for the position of Secretary. Joe Parrino seconded the motion, City of Montebello and a vote of the participating members confirmed the election of Chuck Luckey to the position of Secretary.

Wide-band Working Group

A Working Group session open to all, to address the wide-band 700 MHz data channel allocations/assignment was discussed and planned for Wednesday, June 19, 2002. The Time will be at 10:00 AM PST. The location of the meeting will be at Orange County Communications Offices, 840 North Eckoff Street, Suite 104.

Narrow-band Frequency Allotment

A review and discussion of the proposed narrow band, frequency allotment-plan followed.

A motion to accept the plan was made by Garrett Mayer and seconded by Gary Gray, County of Orange.

San Diego raised concerns regarding potential over the water radio frequency levels from the City of Long Beach.

Long Beach also expressed concerns about the extra cost of engineering that may be required for the protection of their system from the City of San Diego.

Further discussion pointed out that LA County, also co-channel with the City of San Diego, is as much a potential threat as City of Long Beach. LAMTA was discussed as a co-channel member. It was decided that the Cities of Long Beach and San Diego will work together to mitigate the potential. The Chair's remarks were that it is prudent for all members to take special measures to mitigate any potential interference during the systems planning and engineering phase.

Simi Valley requested to be moved from their assigned block and will be moved down one block.

Editorial corrections are needed on the low power channels assigned to "Base Fire" and "Mobile Law". A revised frequency list will be re-issued with the appropriate changes. The revised list will be posted on the CPRA website.

The Committee approved the frequency allotment plan at 11:10 AM, with changes above on motion by Gary Gray, second by Garrett Mayer. The Regional Plan was approved for submission to the FCC pending editorial discretion by the Chair on motion by Garrett Mayer and second by Gary Gray. There was unanimous support for the motion.

Next meeting of the Regional Committee will be announced

The Meeting was adjourned.

**Region 5 Southern California
700 MHz Planning Committee
Notice of 4th Meeting**

The region 5 Southern California 700 MHz Regional Planning Committee will hold a 4th meeting on April 16, 2003 at 10:00 am. The meeting will be located at:

Orange County Communications
840 N. Eckhoff St. Suite 104
Orange, CA 92668-1021

For any questions or concerns please contact:

David Buchanan, Chairman
Region 5 700 MHz Regional Planning Committee
County of San Bernardino, Network Services

San Bernardino, CA 92415-0740

Voice 909-387-3337
Fax 909-387-8859
Email dbuchanan@isd.sbcounty.gov

Meeting Agenda

1. Elect new Secretary (Note – Chuck Luckey resigned due to moving out of the region)
2. Review FCC letter dated December 30, 2002
3. Request input from Indian Tribes
4. Approve inter-region agreements.
5. Public Comment

**Region 5 Southern California
700 MHz Planning Committee
Meeting Minutes
(4th Formal Meeting)**

Chair: David Buchanan
Vice Chair: Garrett Mayer

Date: April 16, 2003
Time: 10:00 AM

Location: Orange County Communications
840 N. Echhoff St., Suite 104
Orange, CA 92668-1021

Attendee: See attached Sign-In Sheet

1. Mr. David Buchanan, Chairman, distributed the meeting agenda. The objective of the meeting is to 1.) Elect a new Secretary, 2.) Review FCC letter dated December 30, 2002, 3.) Request inputs from Indian Tribes, 4.) Approve inter-region agreements, and finally 5.) Open for public comment.
2. To replace Secretary Chuck Luckey who resigned due to moving out of the region, the Chairman opened the floor for secretary nomination. Nominated candidates were Ms. Susan Braunsdorf of City of Glendale and Mr. Gary Poon of County of Los Angeles. Gary Poon was elected with majority votes.
3. To satisfy Indian outreach program as noted in FCC letter dated December 30, 2002, the Chairman noted that he has sent letters to all Indian Tribes with identifiable mailing addresses. Few responded.
4. Northern California Committee in reviewing the 700 MHz Plan has concern of 25 KHz voice channel assignment (which is an aggregate of two 12.5 KHz channels) that may lead to unused "orphan" frequencies in small geographical area implementation. Since no specifics are available, this issue is deferred for future plan amendment.
5. Glen Nash of State of California informed the group on State OES Emergency Plan relative to 700 MHz Regional Plan.
6. Mr. Gary Gray of Orange County distributed copy of the Inter-Regional Coordination Procedures. Discussions were made regarding 70 miles distance requirement on adjacent regions border coordination requirement versus NCC's service area plus three (3) miles requirement.

7. Mr. Garrett Mayer of County of Los Angeles introduced a motion to approve the amended Plan and the Inter-Regional Coordination Procedures. Mr. Mike Mockler of MTA seconded the motion. Members unanimously approved the coordination agreement with the added 70 miles distance requirement due to unique geographical terrains in the Western United States.
8. Future review and approval of adjacent regional Plans will be through the elected committee Chair, Vice Chair, Secretary and with joint advice from Mr. Gary Gray of Orange County (who is also the local CPRA Frequency Advisor.) However, all members will have an opportunity to review and comment on plan approvals via e-mail notification. Motion to finalize this procedure was introduced by Mr. Garrett Mayer and seconded by Mr. Mike Mockler. Members unanimously approved.
9. Mr. Glen Nash of State of California, who is in the NCC Technical Committee for 700 MHz Plan, updated the group on Standards for Interoperability Wideband Data Channel. Preliminary Standards called for a 50 KHz bandwidth channel with expandable upto 150 KHz. Scalable Adaptive Modulation (SAM) is the preferred modulation scheme. More information on the standards will be available in July 2003.
10. Chairman David Buchanan summarized the actions taken on the agenda items. He stated that all approved changes will be incorporated in the Region 5 Southern California 700 MHz Plan for final re-submission to the FCC.
11. Next Work Group (non-formal) meeting is scheduled August 27, 2003 with focus on wide band data. Location and specifics will be published in CPRA ComLink and web page at <http://www.cpra.org>.
12. With no further action or comment from members, the meeting was adjourned about 11:47AM.

Region 5 700MHz Public Safety Planning Committee Notice of Filing Window

The Region 5 700 MHz Public Safety Planning Committee is accepting requests for frequency assignments for voice, narrowband data and wideband data channels. This window is open until January 1, 2001. At this time, for voice channels, submit the total number desired without regard to technology or bandwidth. For wideband requests include the number and bandwidth (50kHz, 100 kHz, or 150kHz) desired. Some justification for the numbers requested needs to be included with the request. The committee may as the plan is developed require specific information to support any requests for spectrum. As an example of requirements, previous plans required commitments of funding and mobile loading information.

Submit all information to:

David Buchanan, Chairman

CPRA is a Chapter of
Association of Public Safety
Communications Officials

700 MHz Regional Planning Committee Region 5 Southern California

NOTICE OF FIRST MEETING

The first meeting of the 700 MHz Regional Planning Committee – Region 5 (RPC) will be held as noted below:

DATE Thursday September 2, 1999
TIME 1:00 PM
LOCATION Board of Supervisors Chambers
County Government Center
385 North Arrowhead Ave.
San Bernardino, CA 92415-0110

This meeting is open to all interested Public-Safety Agencies. The Federal Communications Commission in Docket FCC 98-191 requires a Regional Plan be developed before the public-safety spectrum in the new 700 MHz band can be licensed.

AGENDA

1. Introduction and overview of the regional planning process
2. Election of a Regional Chairman
3. Adoption of Operating Procedures
4. Formation of working groups.

For more information contact:

Announcements

Mark your calendar!

Everyone is invited to the February 20th CPRA Meeting which will be held at Talley Communications' new Corporate Headquarters in Santa Fe Springs.

Talley built a training room into this new facility that will be perfect for our meeting. Please RSVP to Bryan Hawkins at brhawki@ci.long-beach.ca.us so our lunch count is accurate. Directions to Talley's new facility can be found at www.talleycom in the "more info" section.

Talley is celebrating their 20th year in business this year! They have supported CPRA and APCO events for two decades. They continue to grow and better provide for their markets each year. The latest is Talley's new Corporate Headquarters in Santa Fe Springs. They doubled the size of their previous building with the 80,000 square foot facility they purchased and customized last year. A tour of their facility will be held at the end of the meeting.

This month's speaker sponsored by Talley is Sergeant Dean Zanone with the City of Seal Beach Police Department. His presentation should not be missed.

Region 5 Southern California 700 MHz Planning Committee Notice of 4th Meeting

The region 5 Southern California 700 MHz Regional Planning Committee will hold a 4th meeting on April 16, 2003 at 10:00 am. The meeting will be located at:

Orange County Communications
840 N. Eckhoff St. Suite 104
Orange, CA 92668-1021

January 27, 2003

RE: Public Safety Radio Spectrum

Dear Tribal Leader,

The Federal Communications Commission (FCC) in Docket 96-86 allocated 24 MHz of spectrum in the 700 MHz band for public Safety use. As part of the rules for use the FCC is requiring a Regional Plan to be developed. Region 5 is the Southern California Region and covers the Counties of San Louis Obispo, Santa Barbara, Kern, Ventura, San Bernardino, Riverside, Los Angeles, Orange, San Diego and Imperial. If you have any unmet spectrum needs or any interest in planning for this spectrum use, you should send a representative to the next Regional Plan Meeting or contact me.

The next meeting will be held on April 16, 2003 at 10:00 am. The meeting will be located at:

Orange County Communications
840 N. Eckhoff St. Suite 104
Orange, CA 92668-1021

My contact information is:

David Buchanan, Chairman
Region 5 700 MHz Regional Planning Committee
County of San Bernardino, Network Services
777 E. Rialto Ave.
San Bernardino, CA 92415-0740

Sincerely,
David Buchanan

Inter-Regional Coordination And Agreements

From: Hagar, Randall, GSA - Communications (Randall.Hagar@acgov.org)
To: David Buchanan; Mark Pallans; mark.schroeder@phoenix.gov
Date: Thursday, January 24, 2008 5:23:03 PM
Cc: Gary Poon
Subject: RE: Region 5 700 MHz Plan revision

Dave,

Region 6 concurs with your revised 700MHz plan, but also recommends that you note the following comments as proposed from Bill DeCamp:

Randy Hagar, Chair
Region 6, 700MHz/4.9GHz
Deputy Director, GSA
Alameda County

Region 5's changes to the attached document basically comprised removing the Wideband Data Section, and converting the frequencies in the frequency list to the new values caused by the realignment of the 700 MHz blocks due to the Second Report and Order released August 2007. Other than renumbering the frequency blocks to match FCC's requirements, in essence it appears unchanged from the former plan.

In reviewing the document, I recommend the following subtle changes to improve the "correctness" of the document.

Under Section **3.0 Region Description**, the paragraph that reads, *"The State of California's request for spectrum is to support a new statewide system that will integrate multiple state agencies on the system. The State is also designating the system to accommodate local agencies that wish to participate."* can be deleted since the State has withdrawn its request for the 120 – 700 MHz General Use 6.25 kHz channel pairs that were to be used for PRISM.

In the document, wherever *"TIA/EIA TSB88-A (or latest version)..."* appears, it might be rewritten *"The latest version of TIA/EIA TSB88..."*. The current version is "B", but "C" is imminent.

Under Section **5.3 Procedure for Frequency Coordination**, you may wish to add the following closing paragraph: *"Region 5 will provide data to the National Public Safety Telecommunications Council (NPSTC) Computer Assisted Pre-Coordination Resource And Database (CAPRAD) to assist with intraregional coordination."*

Under Section **5.4 Adjacent Region Spectrum Allocation**, the second paragraph reads, *"Region 5 will provide data to the National Public Safety Telecommunications Council (NPSTC) Pre-Coordination Data Base to assist with adjacent region coordination."* To emphasize CAPRAD, it should be rewritten, *"Region 5 will provide data to the National Public Safety Telecommunications Council (NPSTC) Computer Assisted Pre-Coordination Resource And Database (CAPRAD) to assist with interregional coordination."*

Under Section **5.5 Mexico Border Issues**, the frequency ranges in the last sentence should be changed from *"764-776"* and *"794-806"* to *"769-775"* and *"799-805"*

Under Section **6. Interoperability Channels**, the second paragraph under 6.1 Introduction reads, *"The State of California will administer the interoperability channels via a State Interoperability Executive Committee (SIEC) under National Coordination Committee's (NCC) guidelines."* This should be changed to *"The State of California will administer the interoperability channels via the California Statewide Interoperability Executive Committee (CalSIEC) recommended under National Coordination Committee's (NCC) guidelines."*

The sentence should be removed that reads, *"If the State is unable to form the SIEC and develop interoperability operating procedures, then this committee will do so."*

All subsequent references to *SIEC* should be changed to *CalSIEC*.

Under Section **8.3 System Implementation**, the second sentence that reads “*These stations will not move until the year 2006, or after, depending on the 85% market penetration of digital TV implementation*” should be rewritten as, “*These stations are not obliged to move until February 2008.*”

Under Section **10. Spectrum Utilization**, delete the last paragraph which reads, “*Due to the existing TV assignments and HDTV assignments, most of Southern California cannot use this spectrum until the HDTV implementation is completed. This may be sooner or later than 2006. Given this uncertainty, this plan does not limit an agency from initially implementing (if it conforms to FCC rules) a technology that yields less than one voice channel per 6.25 kHz channel or aggregating narrowband data into 25 kHz blocks. The agencies are on notice that they will not receive additional allotments due to using technology that yields less than one voice channel per 6.25 kHz of spectrum or narrowband data of less than 19.2 kbps per 12.5 kHz of spectrum.*”.

Best regards,

William De Camp

Subject: Region 5 700 MHz Plan revision

Please review the attached plan and reply indicating you concurrence with the changes. The major change is the repack of the frequency allotments to reflect the new 700 MHz band plan. We simply moved the current allotments to reflect the new general category narrow band frequencies. There are no additional allotments to the existing plan. Don Root was elected vice-chair. The reference to wide-band channels was deleted.

For note, Region 5 hand packed the allotments and therefore the region is not waiting on the CAPRAD modifications. We will enter the data list into CAPRAD after the modifications are complete. If can provide concurrence prior to January 28th, I will not need to ask for a waiver with the FCC filing. We expect that the FCC will need to modify the protacalls with Mexico and the allotment list will need another modification. If the chages are not in place by late summer Region 5 will modify the list to move San Diego and Imperial allotments to primary US spectrum.

Thanks

David Buchanan, Chair

Region 5 700 MHz Planning Committee

Region 5 700 MHz Planning Committee

*Inter-Regional Coordination Procedures
and
Procedures for Resolution of Disputes
That May Arise Under FCC Approved Plans*

I. Coordination Procedures

I. INTRODUCTION

1. This is a mutually agreed upon Inter-Regional Coordination Procedures Agreement (Agreement) by and between the following 700 MHz Regional Planning Committees, Arizona, Region 3, Southern California, Region 5, Northern California, Region 6, and Nevada, Region 27.

II. INTER-REGIONAL COORDINATION AGREEMENT

2. The following is the specific procedure for inter-regional coordination which has been agreed upon by Regions 3,5,6, and 27 and will be used by the Regions to coordinate between these adjacent Regional Planning Committees when:

a. An application filing window is opened or the Region announces that it is prepared to begin accepting applications on a first-come/first-served basis.

b. Applications by eligible entities are accepted.

c. An application filing window (if this procedure is being used) is closed after appropriate time interval.

d. Intra-regional review and coordination takes place, including a technical review resulting in assignment of channels.

e. After intra-regional review, a copy of those frequency-specific applications requiring adjacent Region approval, including a definition statement of proposed service area, shall then be forwarded to the adjacent Region(s) for review.¹ This information will be sent to the adjacent Regional chairperson(s) using the CAPRAD database.

¹ If an applicant's proposed service area extends into an adjacent Public Safety Region(s) or a base station is within 70 miles of the adjacent regions border, the application must be approved by the affected Region(s).

f. The adjacent Region reviews the application. If the application is approved, a letter of concurrence shall be sent, via the CAPRAD database, to the initiating Regional chairperson within thirty (30) calendar days.

II. Dispute Resolution

(1) If the adjacent Region(s) cannot approve the request, the adjacent Region shall document the reasons for partial or non-concurrence, and respond within 10 (Ten) calendar days via email. If the applying Region cannot modify the application to satisfy the objections of the adjacent Region then, a working group comprised of representatives of the two Regions shall be convened within thirty (30) calendar days to attempt to resolve the dispute. The working group shall then report its findings within thirty (30) calendar days to the Regional chairpersons email (CAPRAD database). Findings may include, but not be limited to:

- (i) Unconditional concurrence;
- (ii) conditional concurrence contingent upon modification of applicant's technical parameters; or
- (iii) partial or total denial of proposed frequencies due to inability to meet co-channel/adjacent channel interference free protection to existing licensees within the adjacent Region.

(2) If the Inter-Regional Working Group cannot resolve the dispute, then the matter shall be forwarded for evaluation to the National Plan Oversight Committee (NPOC), of the National Public Safety Telecommunications Council. Each Region involved in the dispute shall include a detailed explanation of its position, including engineering studies and any other technical information deemed relevant. The NPOC

Service area shall normally be defined as the area included within the geographical boundary of the applicant, plus three (3) miles. Other definitions of service area shall be justified with an accompanying *Memorandum of Understanding (MOU)* or other application documentation between agencies, i.e. mutual aid agreements.

will, within thirty (30) calendar days, report its recommendation(s) to the Regional chairpersons via the CAPRAD database. The NPOC's decision may support either of the disputing Regions or it may develop a proposal that it deems mutually advantageous to each disputing Region.

g. Where adjacent Region concurrence has been secured, and the channel assignments would result in no change to the Region's currently Commission approved channel assignment matrix. The initiating Region may then advise the applicant(s) that their application may be forwarded to a frequency coordinator for processing and filing with the Commission.

h. Where adjacent Region concurrence has been secured, and the channel assignments would result in a change to the Region's currently Commission approved channel assignment matrix, then the initiating Region shall file with the Commission a *Petition to Amend* their current Regional plan's frequency matrix, reflecting the new channel assignments, with a copy of the *Petition* sent to the adjacent Regional chairperson(s).

i. Upon Commission issuance of an *Order* adopting the amended channel assignment matrix, the initiating Regional chairperson will send a courtesy copy of the *Order* to the adjacent Regional chairperson(s) and may then advise the applicant(s) that they may forward their applications to the frequency coordinator for processing and filing with the Commission.

III. CONCLUSION

3. IN AGREEMENT HERETO, Regions 3, 5, 6, and 27 do hereunto set their signatures.

Respectfully,

Curt Knight, Chairperson Region 3

Dear Mr. DeCamp:

Enclosed is a copy of the Region 5, 700 MHz Plan for your review. Please indicate your Region's acceptance and approval of this Plan by signing below and returning this letter to me. If your Region has any issues with this plan please contact me so we can work out acceptable changes.

A prompt reply is appreciated, as we cannot submit our plan again without your Region's approval.

Sincerely,

David Buchanan

RE: 700 MHz Plan Concurrence

Dear Mr. Buchanan:

In response to your letter regarding concurrence to the proposed 700 MHz Regional Plan, please note the following.

Let it be recorded that Region 3 is in receipt of the proposed 700 MHz Regional Plan and concurs with the same. At the present time Region 3 does not have any issues with the plan that would necessitate any changes.

This letter serves as official written concurrence, from Region 3, to the proposed 700 MHz Regional Plan. If I can be of further assistance please do not hesitate to contact me at 602-223-2257, or I can be reached via e-mail at Cknight@dps.state.az.us.

Sincerely,

A handwritten signature in black ink, appearing to read "Curt Knight", is written over the typed name.
